Announcements

Closer to Free Tops \$1.7 Million

Incredible news: The riders and volunteers at last month's 2014 Closer to Free Ride raised more than an astounding \$1.7 million! Those dollars will help us bring our world closer to free. On behalf of the countless patients, researchers, doctors, nurses, caregivers and families affected by cancer, thank you for all of your efforts. I will begin discussing funding priorities with Smilow Cancer Hospital and Yale Cancer Center leadership and look forward to sharing our 2014 funded projects with you in the coming months. Thank you again for your incredible support!

HCAHPS Scores Continue to Rise

The leadership at Smilow Cancer Hospital evaluates our patient- and family-centered care efforts each day, including continuous review of patient satisfaction surveys and Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS) scores. I am proud to announce that in our recent HCAHPS survey, our cumulative scores for our four Smilow Cancer Hospital units exceed the Yale-New Haven Hospital overall scores in all 32 domains. In addition, our Smilow units met or exceeded the 90th percentile ranking in 11 domains and met or exceeded the 50th percentile in 19 domains. We are proud of all of our physicians and nurses, and the entire care staff who work together each day to make sure our patients and families receive the care and responsiveness they deserve. Thank you for all that you do!

from the desk of

Thomas J. Lynch, Jr., MD

Director, Yale Cancer Center

Yale Employees Urged to Complete Workplace Survey

The 2014 Yale University Workplace Survey is now open. Please take the time to complete the survey and send your feedback to Yale School of Medicine and Yale Cancer Center leadership. Through midnight October 21, all university staff will have the opportunity to take the survey online.

All results are anonymous, but your feedback is department specific and important in our annual planning process. The Cancer Center leadership reviews our department results annually and continually works to improve our workplace based on your feedback. Please take the time to share your opinions.

Annual Awards Nominations are Due Next Friday

Yale Cancer Center is pleased to announce our call for nominations for our annual awards in the areas of excellence in research and clinical care. Each award will be announced at the Yale Cancer Center Conclave on Monday, November 24, 2014. The nomination deadline for all awards is Friday, October 24, 2014.

Yale Cancer Center Research Prizes

Three Research Prizes will be awarded in support of excellence in the areas of basic science, clinical research, and cancer prevention and control. One award will be chosen in each area for a paper that is considered to have had the greatest impact on the field this year. The applicant must be a current member of the Cancer Center. The science in the publication must be cancer-focused. Please submit a PDF of your best publication (publication date from October 2013 to Sept 2014). To be eligible you must be either the first or last author of the publication. Email your publication to [Christen Ruff](#).

Yale Cancer Center Award for Clinical Excellence

This award will be given to the physician who best exemplifies excellence in clinical care including superb clinical skills, use of a patient- and family-centered approach to care, and inclusion of a multi-disciplinary care model. Nominee must be a current member of Yale Cancer Center. Please nominate yourself or a peer and send a brief nomination letter (one page maximum) to [Christen Ruff](#).

Notables

Benjamin Toll, PhD has been awarded an **R21 grant** from the **NIH** to implement a smoking cessation clinical trial evaluating the differences between standard care intervention (counseling plus nicotine replacement) and standard care plus monetary rewards for smoking cessation in presurgical cancer patients. The primary aim of the proposed study is to develop an effect size for smoking cessation at the time of surgery (7-day point prevalence), with a secondary aim of creating an effect size for long-term abstinence at 3 months post-surgery. He and his research team will also examine exploratory outcomes of perioperative complications and rates of continuous abstinence. **Dr. Roy Herbst** is a co-investigator on the trial with Dr. Toll.

Linda Niccolai, PhD was awarded an administrative supplement grant to the Cancer Center core grant for one year of support to fund her project on "**Increasing Human Papillomavirus Vaccination Coverage among Adolescents in Connecticut.**"

James Yu, MD received a **PhRMA Foundation Research Starter Grant** at the Turning The Tide Against Cancer Conference last week. The grant will support his research on "**Quantifying the Benefit of Modern Cancer Therapy for Elderly Patients: A Population Level Measurement.**"

Roy S. Herbst, MD, PhD, presented on the Lung Cancer Master Protocol during his lecture on "**Patient-Centered Clinical Development Models**" at the Turning the Tide Against Cancer Conference last week in Washington, DC.

LATEST POSTS:

For young people with cancer, the Make-A-Wish foundation can provide opportunities previously unimaginable. Although some might use their wish to go to Disney World or to meet President Obama, Anabel Gosseline, who is fighting brain cancer, decided to use her wish in a unique way.

Congratulations to the following Yale Cancer Center employees who are celebrating milestones of employment with Yale University:

Catherine Adrada - 30 years
Sonya Valentine - 25 years
Zia Raven - 20 years
Karina Brierley - 15 years
Kathryn D'Addeo - 15 years
Renee Gaudette - 15 years
Marion Miller - 15 years
Sarah Renzi - 15 years
Clara Robinson - 15 years
Aileen Schecter - 15 years
Jo-Ann Gargiulo - 10 years
Alexandra Reyes - 10 years
Dorothy Saccavino - 10 years
Marcia Talarczyk - 10 years
Savannah Woods - 10 years
Richard Carr - 5 years
John Jones - 5 years
Mary Ann Melnick - 5 years
Michele Messina - 5 years
Matthew Osborne - 5 years
Michele Robertino - 5 years
Nicole Scott - 5 years
Kevin Vest - 5 years

Employee Profile: Shirley Pinette

The Employee Profile recognizes the diverse contributions made by Yale Cancer Center and Smilow Cancer Hospital staff to meet our patient care, research, education, and outreach goals. The staff profiled are examples of the great work being done here, and the dedication and values we possess.

To suggest someone to be profiled, please contact [Emily Fenton](#).

From left to right: Magdalena Plasilova, MD, Pat Waldron, Eileen Hansen, Renee Bailey, Mary Ellen Diotalevi, and Shirley Pinette

In 1979, Shirley Pinette started her career at Yale-New Haven Hospital as a Staff Radiologic Technologist where she

Anabel asked Make-A-Wish Connecticut to help her attend Southern Connecticut State University. On Tuesday, her wish came true!

With her education, Anabel plans to help others with cancer; she intends on studying oncology pharmacy and is considering becoming a nurse.

Yale Cancer Center joined EMCOR Group, Inc. this morning for our 5th annual "Protect Yourself. Get Screened Today." Pink Hard Hat Ribbon to increase awareness of breast cancer screening and early detection.

[Read More >>](#)

Earlier this month, Dr. Katerina Politi penned an opinion piece published by The Hill, in which she urged Congress not to cut funding for cancer research. Dr. Politi specifically discusses the need to continue to support "target therapies," which provided her a better chance of survival.

Although these therapies, which include immunotherapies, appear extremely promising, funding outside of the government remains limited. Dr. Politi worries that the lack of new funding will prevent the research

performed all routine radiographic examinations. She quickly promoted to supervisor and teacher, and at one point was supervisor for over 30 Radiologic Technology students in the clinical setting, and moved into the field of breast cancer exclusively in 1993 as Manager of Breast Imaging. For the past five years Shirley has served as Outreach Manager for the Breast Center at Smilow Cancer Hospital, responsible for many aspects of community outreach and patient care.

Since Shirley arrived at the Breast Center, she has gone above and beyond for patients every day. One of her main goals has been to spread awareness to the community about the importance of yearly mammograms. She attends health fairs, charity walks, and arranges for the Yale-New Haven digital mobile mammography van to visit various locations within the community. Shirley has also been a constant friendly face to breast cancer patients as they arrive for treatment and has had an impact on the level of care they receive.

Shirley commented, "Not everyone gets to see what happens outside the walls of Smilow and the real difference we are making in people's lives. I hear from men and women all the time about the excellent care their friend, sister, mother or they themselves received at Smilow Cancer Hospital. That makes me feel proud!"

As Shirley looks forward to retirement at the beginning of December it provides an opportunity to look back on all that Shirley has accomplished in her time at the Breast Center. Her staff, patients and colleagues have all benefited from her dedication and hard work, and the example she has set.

Dr. Donald Lannin, Professor of Surgery (Oncology) in the Breast Center commented, "Shirley has played a huge role in the growth and development of the Breast Center over the last 13 years, even before it was at Smilow. She is a true 'team player' and is always ready to dig in and tackle any problem that comes up. The typical image of Shirley is a small very pleasant woman who is moving very quickly with a very large cup of water."

Anees Chagpar, MD, Director of the Breast Center at Smilow Cancer Hospital at Yale-New Haven, shared, "Shirley is the glue that held much of the Breast Center together. From managing outreach at community health fairs and the mobile mammography van, to supervising our administrative staff, Shirley has done it all -- and did it all well, always with a pleasant demeanor. She got things done with efficiency and poise. She'll be dearly missed!"

Maureen Major Campos, RN, MS, Program Manager for Women's Oncology Services at Smilow Cancer Hospital commented, "Shirley is a dynamic leader whose sole focus is

needed to develop better targeted therapies.

the patient experience and high standards of excellence. She has managed a very successful staff with great patient care outcomes. We have been fortunate to have her on the Breast Center team and she will be missed!"

It is true that Shirley will be missed around the Breast Center by patients, her staff and her colleagues, but she has left a lasting impact and model of what a true leader and teacher should be.

Funding and Award Opportunities

Pancreatic Cancer Action Network Career Development Awards

The annual Pancreatic Cancer Action Network-AACR Research Career Development Awards represent a joint effort of the two organizations to encourage junior faculty who have completed their most recent doctoral degree or medical residency within the past eleven years to conduct pancreatic cancer research and establish successful career paths in the field. The research proposed for funding may be basic, translational, clinical, or epidemiological in nature and must have direct applicability and relevance to pancreatic cancer.

Free to Breathe Issues Request for Proposals for Lung Cancer Research

Free to Breathe, a partnership of lung cancer survivors, advocates, researchers, healthcare professionals, and industry leaders united in the belief that every person with lung cancer deserves a cure, has issued a Request for Proposals for research projects focused on preventing or stopping lung cancer metastasis.

Grants of up to \$600,000 over three years will be awarded in support of innovative, high-impact lung cancer research that leads to clinical translation (e.g. clinical trial) by the end of the award period. The partnership is particularly interested in proposals that include interdisciplinary teams and two or more principal investigators; collaborations with industry partners (PIs must be employed at a nonprofit entity such as an academic or research institution); access to existing patient samples or data, especially tissue from metastatic sites; studies that include mechanistic investigations into the underlying causes of metastasis; studies that are distinct research components of new or existing clinical trials; and/or novel approaches for preventing brain metastasis.

Application Deadline: November 7, 2014

Special Opportunity: Bristol-Myers Squibb-MRA Established Investigator Awards in Immunotherapy

Up to \$125,000 per year for 2 - 3 years to conduct projects focused on advancing the immunotherapies in melanoma.

MRA Pilot Awards

\$50,000 per year for 2 years for potentially transformative pilot studies.

Special Pilot Opportunity: Society for Immunotherapy of Cancer-MRA Pilot Award

\$50,000 per year for 2 years potentially transformative pilot studies in the area of immunotherapy.

MRA Established Investigator Academic-Industry Partnership Awards

Up to \$100,000 per year for 2 - 3 years. Industry funds and/or in-kind support (e.g., reagents, clinical grade drugs, equipment, contract services) must match but may exceed MRA funds for the award period. Industry scientists may serve as co-investigators or collaborators, but may not be PIs. (Deadline: November 21, 2014)

Special Opportunity: Amgen-MRA Established Investigator Academic-Industry Partnership Award

In collaboration with Amgen, applications are solicited for preclinical or correlative laboratory studies related to the therapeutic potential of oncolytic virus immunotherapy in melanoma, alone or in combination with immune modulators (e.g., checkpoint inhibitors) or targeted therapies. Potential biomarkers of response in local and distant tumors and immune cell-type identification/evaluation in tumors and systemic changes related to oncolytic virus immunotherapy treatment are of interest. Mechanism of action studies using in vivo imaging or molecular techniques to differentiate direct versus immune-mediated effects are encouraged. Up to \$100,000 per year for 2 to 3 years from MRA may be requested. Amgen funds will match MRA funds for the award period for a total combined award amount of up to \$600,000.

MRA Young Investigator Awards

Investigators within 4 years of their first academic faculty appointment.

MRA Young Investigator Awards

Up to \$75,000 per year for 3 years for translational research projects.

Special Opportunity: MRA Young Investigator Award in Dermatology

Seeking applications from dermatologist young investigators who remain actively engaged in patient care and are proposing studies in melanoma prevention, diagnosis/staging, and treatment.

MRA Team Research Awards

Special Opportunity: Bristol-Myers Squibb-MRA Team Science Awards in Immunotherapy. Awards for multidisciplinary teams of two or more established PIs, along with at least one Young Investigator to conduct projects with the potential to lead to transformative advances in melanoma immunotherapies. Up to \$900,000 total over 2 - 3 years may be requested.

MRA Team Science Academic-Industry Partnership Awards
These awards are designed to facilitate progress via interactions between the academic and industrial research sectors in the team setting, and will be co-funded by MRA and an industrial collaborator whose involvement is essential to the project. Multidisciplinary teams of two or more established PIs will receive up to \$500,000 total over 2 - 3 years from MRA to conduct projects supported by preliminary data. Each team must include at least one Young Investigator as a co-investigator.

Application Deadline: November 21, 2014

Yale Tobacco Center of Regulatory Science Pilot Project Grants

The Yale Tobacco Center of Regulatory Science (TCORS) is offering funding for pilot projects to initiate *research relating to understanding tobacco additives and modified risk tobacco products* through behavioral, molecular, laboratory, pharmacological, epidemiological, and economic sciences that involves humans (both clinical & epidemiological research) and animals (basic research). We are particularly interested in studies of menthol, flavors, sweeteners, and e-cigarettes and studies using novel techniques. Yale TCORS will fund 3-5 pilot projects at the level of \$25,000 to \$75,000 (direct costs only). The project must be completed in 1 budget year (9/1/15-8/31/16).

Application Deadline: December 5, 2014

Employment Opportunities

Success in any clinical research endeavor, but especially in cancer research, requires the most qualified, dedicated staff, committed to excellence and the mission of Yale Cancer Center. The combination of education, oncology research experience, and exceptional nursing skills is enormously difficult to find. Your participation, as knowledgeable colleagues, is invaluable at this time.

Should you know individuals with outstanding clinical research nursing experience, and who are ready to join our team, please direct resumes to [Sandra Greer](#), Sr. Staffing and Career Development Representative or call (203) 432-5822. All referrals will be held in strictest confidence.
