Announcements

Pat LoRusso Named Translational Working Group Leader for Phase I

The momentum in the Phase I Team has continued to climb since Pat joined us last August, and I am pleased to announce that our senior leadership team has appointed her to the position of Translational Working Group (TWG) Leader for the Phase I group, effective today. In this role, she will continue to work with Paul Eder, Clinical Program Leader for Phase I, to collaborate and expand our Phase I research efforts throughout the 12

Clinical Programs at Smilow and in our Care Centers. I look forward to continued progress in this area, and thank Pat and Paul for their leadership.

New Assistant Directors Named for YCC

The Executive Committee of Yale Cancer Center has selected three new Assistant Directors to our leadership team to help achieve our CCSG goals and objectives, and to further our outreach efforts.

from the desk of

Thomas J. Lynch, Jr., MD

Director, Yale Cancer Center

Physician-in-Chief Smilow Cancer

Hospital at Yale-New Haven

Anees Chagpar, MD, MPH, MBA, Director of the Breast Center at Smilow Cancer Hospital and Associate Professor of Surgery, has been named Assistant Director for Global Oncology. In her new role, Dr. Chagpar will inventory the current research and outreach occurring from Yale in oncology across the globe, and investigate new areas of concentrated research and/or partnerships Yale Cancer Center may choose to focus on.

Beth Jones, PhD, MPH, Research Scientist and Lecturer in Epidemiology in the School of Public Health, has been named Assistant Director for Diversity and Health Equity. Dr. Jones will assist Yale Cancer Center in promoting diversity, eliminating disparities, and embracing health equity through research and education in our catchment area of Connecticut.

Andrea Silber, MD, Associate Clinical Professor of Medicine (Medical Oncology), has been named Assistant Clinical Director for Diversity and Health Equity. Dr. Silber will also assist Yale Cancer Center in promoting diversity, eliminating disparities, and embracing health equity. She will focus on engagement with community partners in improving education for prevention and screening and access to cancer care

for diverse populations within our local community as well as the greater New Haven area.

Two Outstanding Radiation Oncology Colleagues Retiring

After decades of dedicated patient care, research, and teaching in radiation oncology, both Yung Son and Richard Peschel have announced their retirements. Both Drs. Son and Peschel have had major impacts on the clinical, teaching, and research missions of Yale School of Medicine and YNHH. They have been extraordinary physicians, teachers, and colleagues. Please join me in wishing them well and thanking

New study predicts the severity and timing of fatigue in cancer patients, allowing for better preemptive measures to be put in place to help patients through treatment and manage fatigue.

"Fatigue has been recognized as the number one symptom experienced universally by cancer patients," said Ruth McCorkle, Assistant Director for Psychosocial Oncology at Yale Cancer Center.

them for their outstanding dedication during their incredible careers here.

Yung Son received his MD in 1950 from Seoul National University in Korea. He trained in radiation oncology at the Princess Margaret Hospital in Toronto and subsequently joined the Yale faculty in 1962. He took a brief detour to the University of Virginia and then to the State University of New York from 1966 to 1973, returning to Yale in 1973. He was promoted to Professor of Therapeutic Radiology in 1982. Dr.

Son for many years provided radiation oncology services to the West Haven VA hospital, while developing specialty expertise in head and neck cancer. He established one of the most robust head and neck brachytherapy programs in the country, performing hundreds of brachytherapy treatments over the years. In conjunction with Dr. Clarence Sasaki in the Department of Surgery, Dr. Son established a unique combined surgery and brachytherapy program for the treatment of recurrent head and neck cancers. After 53 years as an attending physician in radiation oncology, Dr. Son will be retiring as of May 31

this year.

Richard Peschel came to medicine and radiation oncology after completing a PhD in nuclear physics at Yale in 1975. He received his MD from Yale in 1977 and was a resident in radiation oncology at YNHH from 1977-1980, after which he joined the Yale faculty. Dr. Peschel developed expertise in several areas. He was Director of the Section of Gynecologic Oncology in the Department of Therapeutic Radiology from 1983-

1990, and then turned his attention to prostate cancer and other urologic malignancies. He rapidly established international expertise in this area, authoring numerous textbooks and well over 100 papers that helped to define our current approaches to radiotherapy for prostate cancer. He also provided continuous leadership to the department, serving as medical director of the radiation oncology departments at Uncas-on-Thames Hospital in Norwich, Lawrence & Memorial Hospital in New London, and Bridgeport Hospital. He has played a major role in education at Yale, serving as Director of the Residency Program at YNHH from 1983-1991 and helped to train numerous leaders in the field, including three current department chairs at major centers. He was also Director of the L&M Community Cancer Center from 2003-2009. After 35 years as an attending physician in radiation oncology, Dr. Peschel retired yesterday.

Congratulations to Dr. Roy Herbst who was recently elected to the Association of American Physicians (AAP), one of North America's oldest medical honor societies.

"It is an honor to be inducted into an organization that focuses on translational science and mentorship," said Dr. Herbst, Chief of Medical Oncology and Associate Director for Translational Research at Yale Cancer Center and Smilow Cancer Hospital. "I hope to further promote the values of the Association here at Yale."

YCC New Member Happy Hour

Please join us to welcome YCC's newest members on Wednesday, May 27, 5:00-6:30 PM at the Boyer Center for Molecular Medicine (BCMM 206/208) for drinks and hors d'oeuvres on the patio. Please RSVP to [Christina Dreyfus](#) by Thursday, May 21st.

YCC Scientific Retreat

You are cordially invited to this year's YCC Annual Scientific Retreat on Wednesday, May 20th at Yale West Campus Conference Center. Breakfast begins at 9:30 AM with the formal program starting at 10:00 AM.

This year's keynote address will be given by Mark A. Lemmon, PhD, currently a Professor of Biochemistry and Biophysics at the Perelman School of Medicine at the University of Pennsylvania, and soon to be a leader of the Cancer Biology Institute at West Campus.

The afternoon session promises to build upon last year's excitement. Dr. Dan DiMaio will be announcing the establishment of a new YCC Research Award and will describe a major new YCC funding opportunity seeking transformative multidisciplinary cancer research projects.

It is essential that we have a firm count of attendees, so please RSVP to [Christina Dreyfus](#) by Friday, May 8th.

The Scientific Publication Program

The Scientific Publication Program is available to connect members of Yale Cancer Center with a qualified freelance editor who can improve publication and grant manuscripts. Whether your manuscript needs organizational clarity or grammatical assistance because English is your second language, an editor will work with you to make those important revisions. Open and free to all members of Yale Cancer Center, please contact Christina Dreyfus in the Office of Research Affairs at (203) 737-8375 to get started.

Researchers from Yale Cancer Center have devised a way to re-engineer lupus antibodies to turn them into potential cancer killers. Lupus is a chronic inflammatory disease that occurs when the immune system attacks its own organs, tissues, or joints. The team, led by Dr. James E. Hansen, assistant professor of therapeutic radiology, has shown that altering the antibodies to help them penetrate cancer cells and bind to DNA enables them to selectively kill tumors with defects in DNA repair.

The Clinical Research Forum awarded its top honor to Yale Cancer Center's **Dr. Roy Herbst** for a paper he co-authored on immune therapy for multiple types of cancer. The top prize, The Herbert Pardes Clinical Research Achievement Award, was awarded for a team-written paper published last November in the journal *Nature*. Dr. Herbst was first author of the paper that reported how the presence of PD-L1, an immune-suppressing protein in non-cancerous immune cells, may predict how patients will respond to treatment.

Qin Yan, PhD, a member of the Cancer Genetics and Genomics Program, has been awarded another **NCI R21 grant** (\$398,352 total) to study the roles of epigenetic mechanisms of drug resistance. The title of the project is "Identifying epigenetic changes critical for trastuzumab resistance." The project will be done in collaboration with Drs. David Stern, Narendra Wajapeyee, Michael DiGiovanna, and David Rimm.

Nancy Carrasco, MD, Professor of Cellular and Molecular Physiology and a member of Yale Cancer Center's Cancer Genetics and Genomics Program, has been elected into the **National Academy of Sciences**, one of the highest honors bestowed upon scientists.

Dr. Roy Herbst recently was elected to the **Association of American Physicians** (AAP), one of North America's oldest medical honor societies. Dr. Vincent T. DeVita, Jr. nominated Dr. Herbst for membership. "Being elected to the AAP is a great honor richly deserved by Roy Herbst whose research with targeted therapy and immunotherapy of lung cancer has had a significant impact on the field of cancer treatment," Dr. DeVita said.
