Inside Yale Cancer Center

August 5, 2016

## Announcements

### New Yale Medicine Brand

As you know, on August 31st, Yale Medical Group will rebrand as Yale Medicine, and launch new positioning, 'we care.' As part of this rebranding effort, Yale Cancer Center's name will change to Yale Medicine Cancer Center. All Yale faculty and staff have received additional information on the rebranding efforts from Yale Medical Group leadership. Our website will launch with the new Yale Medicine Cancer Center brand on August 31 and all printed materials will begin updating in September. If you have any questions on the rebranding process for the Cancer Center, please contact [Renee Gaudette](#).

### NCI Outstanding Investigator

I am very pleased to announce that Madhav Dhodapkar, MBBS has received an Outstanding Investigator Award from the National Cancer Institute. This prestigious award is given to a distinguished group of accomplished leaders in cancer research each year to support their research efforts. The \$7 million grant will support Madhav's research for seven years. His research team will use the funding to combine new approaches for early detection and prevention of cancer, and explore how the immune system regulates the transition to cancer.

### LATEST ARTICLES:

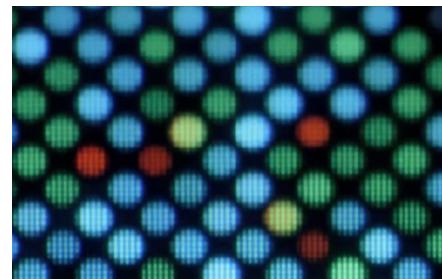

**Ranjit Bindra, MD, PhD**, a member of our Radiobiology and Radiotherapy Research Program, has received a \$50k grant from the **Pablove Foundation**. The foundation supports research on rare pediatric cancers and will support his work to study "Small Molecule Screening for Novel Rhabdoid Tumor Inhibitors."

**Mark Lezenby, MD**, a member of our Cancer Prevention and Control Research Program, participated in a Palliative Care Retreat and training at the **King Hussein Cancer Center** in Amman, Jordon.

**Brian Shuch, MD**, a member of our Developmental Therapeutics Research Program, has received a Career Development Award (K08) Grant from the **National Cancer Institute** to support his work to study "Genomic Heterogeneity and the Small Renal Mass."

Yale New Haven Children's Hospital is one of 18 recipients across the country to receive a **2016 Hyundai Impact Grant** from Hyundai Hope On Wheels®. The \$50,000 Impact Grant was presented to **Gary Kupfer, MD**, Clinical Program Leader, **Pediatric Hematology & Oncology Program** at Smilow Cancer Hospital. Yale New Haven Children's Hospital was chosen as a recipient due to its proven track record of caring for children with pediatric cancer. These grant funds will be used to improve care and increase treatment options for children with cancer.

**Dr. Roy Herbst, Dr. Patricia LoRusso**, and **Dr. David Rimm** joined a few of our senior fellows at the **ASCO/AACR Methods in Clinical Cancer Research Workshop** on clinical trial design last week in Vail, CO.

## New Member Highlight: Mary Tomayko, MD, PhD

The Cancer Immunology Research Program is happy to welcome Mary Tomayko, MD, PhD, to its membership. Dr. Tomayko, currently an Associate Professor in the Department of Dermatology, has been with Yale since 2001. Her cancer-related work includes diagnosing and treating patients with epithelial cutaneous carcinomas, melanoma, cutaneous lymphoma and patients with adverse reactions to cancer chemotherapy, radiotherapy, and checkpoint blockade. Dr. Tomayko's lab identified a critical role for PD-1 and its ligands PD-L1 and PD-L2 on the formation of a durable B cell response in mice and has established PD-L2 as one of the best markers for memory B cells in mice. Dr. Tomayko became interested in YCC membership when she and her colleagues began noting an increased risk for the development of bullous pemphigoid, a rare autoantibody-mediated blistering disease, in melanoma and lung cancer patients treated with checkpoint blockade. Her lab is now focused on determining the role of B cells in the immune response to malignancy and on elucidating the consequences that PD-1 inhibition therapy has on the function on regulatory lymphocytes and antibody forming cells.

## Research in the News

### Genome-editing 'toolbox' targets multiple genes at once

A Yale research team has designed a system to modify, or edit, multiple genes in the genome simultaneously, while also minimizing unintended effects. The gene-editing "toolbox" provides a user-friendly solution that scientists can apply to research on cancer and other disciplines, the researchers said.

**Join Yale Cancer Center  
on Facebook**

Yale Cancer Center member, Qin Yan, PhD, and his co-authors tackled these challenges in multiple ways. In previous systems, the genome-editing machinery was constantly turned on, leading to more off-target effects. To avoid these effects, the team first developed a strategy to make the machinery "inducible" - able to be turned on and off. They used a drug to turn the machinery on just long enough to edit the genes. This approach allowed them to activate the machinery as needed and for a limited amount of time, reducing off-target effects, they said.

Their gene-editing system also contained a fluorescent marker so the researchers could track whether the editing enzyme was turned on or off in cells, noted Yan.

#### **Ovarian Cancer Academy Award**

Early-Career Investigator must be within the first 3 years of his/her first faculty position (or equivalent) at the time of submission. Supports the addition of new Early-Career Investigators to the unique, interactive virtual academy that will provide intensive mentoring, national networking, and a peer group for junior faculty.

**Application Due:** August 10, 2016

[Learn More >>](#)

#### **Pilot Award**

Investigators at or above the postdoctoral level (or equivalent). Supports innovative, high-risk/high-reward research that could ultimately lead to critical discoveries or major advancements that will drive the field of ovarian cancer research forward.

**Application Due:** August 10, 2016

[Learn More >>](#)

#### **DOD Peer Reviewed Cancer Research Program Funding Opportunities for Fiscal Year 2016**

The FY16 Defense Appropriations Act provides \$50 million (M) to the Department of Defense Peer Reviewed Cancer Research Program (PRCRP) to support innovative, high-impact cancer research. The PRCRP is providing the information in this pre-announcement to allow investigators time to plan and develop applications. FY16 PRCRP Program Announcements and General Application Instructions for the following award mechanisms are anticipated to be posted on the Grants.gov website in April and July 2016. Pre-application and application deadlines will be available when the Program Announcements are released.

#### **Horizon Award**

PI: A predoctoral candidate within two years of successfully passing qualifying examinations or a postdoctoral fellow within three years of completion of his/her terminal degree (excluding medical residency or family medical leave).

**Application Due:** August 17, 2016

Here at Smilow Cancer Hospital, we firmly believe that emotional healing contributes significantly to physical healing. That's why we put maximum effort into every aspect of our patients' care - including the artwork that graces our halls. Patients and families have found solace in our Healing Art Gallery for years, and we're proud to feature "Water Music," a collection of photographs by Roslyn Meyer, PhD, as our next exhibition. Dr. Meyer is a longtime supporter of our hospital's cancer research efforts. We would like to thank her for her continued generosity and hope that her photographs bring moments of peace to all the patients and families who see them.

## **Yale Cancer Center 2016 Pilot Grants for research in non-AIDS defining cancers in aging HIV+ population**

Yale Cancer Center is pleased to announce a Pilot Grant competition for two grants at \$120,000 (60,000 annually for two years) for a specific project headed by a member of Yale Cancer Center. The intention of these two grants is to support research in non-AIDS defining cancers in aging HIV+ populations, address cancer disparities in the HIV+ populations of New Haven, foster collaborations and translational activities, encourage junior faculty members to establish their career in this area and have the potential to translate into future independent NIH grant applications.

**Deadline for submission** is 4:00 p.m. on Thursday, August 25. Please direct all questions to [Walther Mothes](#)

## **SU2C CIRM CLIN 2 Grant Program**

Stand Up To Cancer (SU2C) calls upon members of the SU2C community to contribute ideas for clinical research to the California Institute of Regenerative Medicine's (CIRM) CLIN 2 grant program.

In addition to traditional stem cell research, CIRM would like to support projects that involve memory t-cells, progenitor cells (e.g. monocyte-derived dendritic cells), or treatments that target cancer stem cells as their primary mechanism of action.

**Deadline:** Send proposals

to [proposals@su2c.org](mailto:proposals@su2c.org) by September 2nd. After that date, SU2C and CIRM will review letters of intent on a monthly basis.

When Bob Carlson was diagnosed with stage IV lung cancer five years ago, the standard treatments were tough on his body and just didn't work against the disease. That's when he was told a clinical trial might be an option, and he visited Smilow Cancer Hospital. Now, a few years into his trial, Bob is feeling much better than he ever did during his standard treatments, and can still pursue things he loves, like photography. "A clinical trial gave me a chance to be alive," Bob said. "If it didn't work, I knew it would be helping future generations, so it was a win win in my mind."

**"I don't dwell on the fact that I have cancer. I am lucky that I don't feel sick and I still have a life to live."**
