Announcements

Teen Center Opens

Yale New Haven Children's Hospital and Smilow Cancer Hospital recently opened a dedicated space for our adolescent and young adult patients on the 7th floor of the Children's Hospital. The Lauren Telesz/Smilow Teen Center is designed to offer a space for teenage patients to socialize with one another and with friends and family, while at the hospital. The new space also provides video games, tablets, and a big screen to view movies.

News Center

ASH and SABCS Participation

Over the next week, members of our Breast Center and Hematology programs will travel to the American Society of Hematology annual meeting in San Diego and the San Antonio Breast Cancer Symposium to present research and clinical advances from Yale Cancer Center and Smilow Cancer Hospital. Several faculty members have presentations on the podium and poster presentations. If you are attending either meeting, please take the time to support your colleagues during their presentations.

Doximity

We all recognize that our annual ranking for reputation through *U.S. News & World Report's* annual Best Hospital's Guide does not truly reflect the exciting translational research, innovative science, and fantastic patient care happening here at Smilow Cancer Hospital and Yale Cancer Center. Four years ago, *U.S. News* introduced online voting for reputation scores through [Doximity](#). The majority of our physicians and caregivers have already registered with the site and voted online last year, but it will take several years to impact the reputation rankings data and **I urge full participation.**

To have the opportunity to vote in February, your registration in [Doximity](#) must be completed **today**. Please take a moment to confirm your registration is active and complete by searching your name and verifying your account on [Doximity](#), so you will have the opportunity to vote for *U.S. News* hospital rankings in your specialty area this February.

Holiday Party on December 12

I hope you and your family will join us to celebrate the holiday season at the annual Yale Cancer Center and Smilow Cancer Hospital holiday party on Wednesday, December 12 at the Peabody Museum. Stop by anytime between 5:30-8:30 for food, music, and to wander through the museum with colleagues and friends.

Notables

Cancer Immunology Research Program is proud to welcome **Tae Kon Kim, MD, PhD**. Dr. Kim is an Instructor of Medicine (Hematology). Since graduating from medical school, he has been studying leukemia

a biology and human T cell immunology in the context of allogeneic stem cell transplantation.

Dr. Kim has published three clinical review articles related to the study of leukemia. After completing clinical training for hematology/oncology, he began working on immune evasion of acute myeloid leukemia (AML) under the mentorship of Dr. Lieping Chen.

Dr. Kim has been awarded two translational research grants, the 2015 Seery Clinical Investigator Award, the 2017 American Society of Hematology Scholar Award, the 2018 EvansMDS Young Investigator Award, and the 2018 American Society of Clinical Oncology Career Development Grant to support four separate research projects, which he conceived, designed, and wrote.

Dr. Kim is well-suited for a Yale Cancer Center appointment, based on (1) his past research training in leukemia biology, human T cell immunology, (2) his solid clinical training at the University of Miami, and Yale School of Medicine, (3) his understanding of clinical perspectives of leukemia, and (4) his organized training plan in tumor immunology.

Debra Brandt, DO, Assistant Professor of Clinical Medicine (Medical Oncology) and Medical Director of the Smilow Cancer Hospital Care Center in Torrington, has been elected to represent the medical oncology faculty on the Yale School of Medicine's Dean's **Faculty Advisory Council** for a two-year term.

The cheerleaders at East Celebrity Elite CT in Oakdale, CT participated in a "Change for a Cure" contest in

Rocco Carbone, MS, has never been one to turn down a challenge during his career, so when he was asked to head up a Cell Processing Lab for Yale Cancer Center and Smilow Cancer Hospital, he jumped at the chance. He now serves as Senior Research Specialist for the Clinical Research Support Lab (CRSL), an in-service provider that assists the clinical trials process by ensuring that biospecimen samples from patients are processed, stabilized, and submitted for analysis; a lab which Mr. Carbone built from the ground up.

He also just celebrated his 35 Year Anniversary at Yale!

Since it launched in 2006, the CRSL has expanded quickly, and Mr. Carbone continues to contribute to its success. His current duties include supervising the lab technicians, resolving technical and timing issues, creating standard operating procedures, billing for services, as well as some special projects he is working on. Over the years he has participated in the incorporation of biopsy collections, the development of a system for billing services, the opening of two satellite labs, and the review of many incoming clinical trials. Mr. Carbone gives much of the credit for guiding the growth of the lab to the vision and skills of Lynn Buchwalder, MS, former assistant director of CRSL.

Commenting on his 35 years at Yale, Mr. Carbone said, "I believe the most rewarding aspect of my time at Yale has been the many collaborations with faculty members and laboratories, pharmaceutical companies, and a large number of very gifted Yale New Haven Hospital staff members. Research must be, and I believe it is at Yale, truly a team effort, which begins in a basic research lab and the discoveries are then translated into the clinic to alleviate the patients' suffering."

Stephanie Halene, MD, PhD, Associate Professor of Medicine (Hematology), commented, "Rocco is a treasure. Always kind, always helpful, and always knowledgeable."

October, raising an impressive \$1,100 in change for Smilow Cancer Hospital!

Go Team! Thank you for your support!!

Funding Opportunities

YCC K12 Calabresi Immuno-Oncology Training Program (IOTP) Scholar Awards

We are pleased to solicit applications for the Yale Cancer Center K12 Calabresi Immuno-Oncology Training Program (IOTP) Scholar Awards for junior faculty to enhance research skills beyond the training provided during graduate and postgraduate training. Successful applicants are required to demonstrate a strong commitment to a career in cancer immunology. The two-year IOTP curriculum includes didactic and practical training in basic, translational and clinical aspects of cancer immunology research. The program also includes a required research component (either clinical or bench research, or a combination thereof). Applicants are required to identify a mentor and provide a research and mentorship proposal.

Application Deadline: December 1, 2018

Lion Heart Fund for Cancer Research

Yale investigators are encouraged to submit proposals of innovative, high-potential projects requiring pilot funding. Projects may be in any area of breast cancer research - basic, translational, clinical, outcomes and population science are all welcomed from any discipline or group of disciplines. A committee, comprised of scientific/medical experts from Yale Cancer Center and dedicated Lion Hearts, will review the proposals and choose those to be funded. Funding will be \$50,000 for a one-year project.
